Greenhouse Effect	
habitat	the natural home of an animal or plant
climate change	a change in the normal weather patterns
environment	the <b>surroundings</b> of an animal or plant
global warming	the earth getting hotter
temperature	how we measure heat
scientist	someone who <b>studies</b> science
greenhouse gases	harmful gases that trap heat
pollution	<b>harmful materials</b> in the <b>environment</b>
drought	dry weather, no rainfall
extinct	animal or plant dies and no more is made
